

MOBILE SIGNATURE MANAGEMENT

SENTRY: eSigning™

EASILY COLLECT AND MANAGE CUSTOMER SIGNATURES

SQN Banking Systems' **SENTRY: eSigning™** allows financial institutions to use an iPad or Android tablet to capture, store and retrieve any document that requires a signature image, as well as the signatures themselves. There are two modules that are part of the program.

First, **SENTRY: SigTab** allows users to capture signatures in the branch or at customer locations. Whether the document is for a new account opening, mortgage application, loan application, or something else, it allows the institution to provide customers with tremendous flexibility.

Once loaded onto your tablet, **SENTRY: SigTab** can:

- gather signatures using either a stylus or a fingertip
- collect multiple signatures under one account or on one document
- send captured signatures to a database immediately via web service, or store them on the tablet to be uploaded later
- embed signatures into PDF documents
- scan and store other documents as well, including photo IDs and passports

SENTRY: SigTab also allows users to find signatures by searching account data such as name, branch and account number. The application easily interfaces into existing document management systems, and automatically creates an audit trail of all transactions.

SENTRY: SigTab, allows you to capture signatures, photo IDs and passports.

SENTRY: eSigning™

SENTRY: DocTab allows you to manage documents more effectively. Also designed for use with iPads or Android tablets, it allows financial institutions to capture data and signatures on electronic PDFs.

SENTRY: DocTab features:

- document can be sent to a database immediately via web service, or stored on tablet and uploaded later
- ability to display and embed signatures into PDF documents
- export signature image and form meta data to other systems
- can also capture photo IDs and passports
- compatible with any document such as new account openings, mortgage applications, loan applications and more

The screenshot shows a mobile application interface for filling out a PDF form. The form is titled "SQN Banking Systems Sample Fillable PDF Form" and features the SQN logo with the tagline "Fraud protection you can trust." The form contains several sections with input fields: "NAME" (First, Last, Middle), "ADDRESS" (Street, City, State, Zip), "TELEPHONE" (Home, Work, Cell), "EMERGENCY CONTACT INFORMATION" (Name, Relationship, Phone), "SOCIAL SECURITY NO." (with a "Show/Hide" toggle), "SEX" (Male, Female), "DATE OF BIRTH" (Month, Day, Year), and "EDUCATION" (with a list of options and a "Show/Hide" toggle). A green "Save and Sign" button is located at the bottom right. A "Copied to clipboard" notification is displayed at the bottom center of the screen.

SENTRY: DocTab, enables you to fill out PDF templates on an iPad or Android tablet to capture the customer data you need.
